Rida Metal riser doorsets

The durable steel construction with an E30Sa fire rating offers a cost effective alternative to timber riser doorsets.

Images for illustrative purposes only. Not all configurations are fire rated.

Affordable concealed fire protection

The perfect replacement for short-lived timber doors that warp and bow. Rida metal doorsets are made of non-combustible materials; reducing the risk of uncompliant installations, achieving E30Sa fire resistance and improving building safety.

[View Rida](#)

Typical applications

The standard sizing of Rida makes it an affordable choice for high-volume applications that require strong, reliable and safe risers such as:

[Residential Apartments](#) / [Student Accommodation](#) / [Educational Facilities](#) / [Healthcare](#) / [Commercial](#)

Fire-stopping Protection

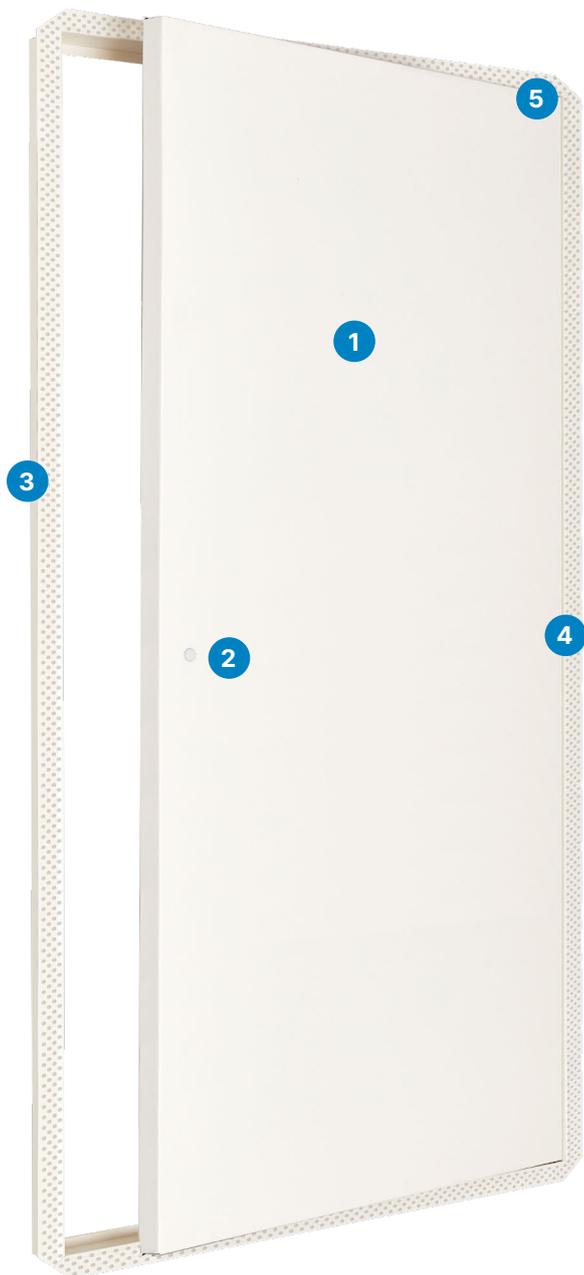

Quench  **PRE-APPLIED**

Factory fitted fire stopping means consistency and assurance of compliance with no additional on-site labour required!

[View Quench](#)

Once installed, Rida can be plastered or tape and jointed up to the integral stop-beads creating a perfectly flush profile with the wall.

- 1 Powder-coated steel door
- 2 3-way lock system (with plastic bung)
- 3 Perforated fixing flange
- 4 Concealed frame
- 5 Concealed pivot hinge

The better alternative to timber:

Say goodbye to warping timber doors!

Changes in climate within the environment can cause timber doors to twist and warp. Rida removes this risk of non-compliance due to its steel construction which is not affected by differing climate conditions.

Compliant with the latest legislation

Rida is a complete, fire-tested doorset system reducing the inherent risk of using mixed and untested components.

Factory assembled modular system

Providing guaranteed quality and consistency.

Less dependence on skilled labour

As a pre-assembled doorset, installation is faster, easier, and more accurate than traditional timber doors reducing the risk of snags from poor workmanship.

Easy maintenance and redecoration

Requiring little to no maintenance, Rida removes the headaches of remedial works associated with timber doors. The 'dead-matt' finish is designed to be painted with wall emulsion, no masking or special paints required.*

*Maximum permitted thicknesses apply - See datasheet for more information

Standard sizes

LEAF SIZE (mm)	S/O (mm)	HANDING	ORDER NO.
SINGLE			
1900×500	1920×520	LSH	SEL-PRT-14000-1

EXCLUSIVE PRODUCT INNOVATIONS:

Riser Doorsets

Quadra+ Ligna Una

High performance doorsets to conceal unsightly riser doors in corridors and access areas.

Concealed Frame Doors

Arriva Innova+

Frameless doorsets for high-end residential properties to enhance contemporary interiors.

Nulfire™

Fire-compliant door sets within wall-lining systems

Enabling Quadra+ Riser Door system to be installed in projection to rigid supporting construction. Nulfire is not compatible with Rida.

Concealed Smoke Damper

FumaCE

Concealed single blade smoke control corridor damper CE marked to BS EN12101-8:2011.

Temporary Fire Doors

Tempus

Designed to withstand the rigours of a construction site whilst maintaining fire compliance.

Sliding Pocket Doors

Enigma

Utilise every square inch of your room with the No.1 Pocket Door with limitless design options.
