

Quench® Fire-stopping Protection

SELO®
PATENTED
INNOVATION

What is the Quench® Fire-stopping system?

Our metal riser doorsets now have the option to arrive on-site with the fire stopping material already fixed into place.

Fail-proof installations

No need for intumescent mastic to be applied on site. Assurance for contractors and building control.

Safe & Reliable

Avoids working within the riser to apply intumescent, removing fall risk and hazardous working environments.

Workmanship

Removes the final element of labour dependent workmanship, a truly complete pre-assembled door set.

Risk-free

In making the door set 100% pre-assembled it assists in mitigating risk from an installation perspective.

Effective time management

This system will save you time in the overall installation process.

Simplicity

Only tools required are cordless-drill driver, a level and screws.

Additional system enhancements:

- / Bigger, stronger 50mm fixing flange for when openings are lined
- / Improved quick release pivot system for faster access and engagement
- / Tested and certified from both sides of the door for complete protection
