Accurate Adjustable Frame Bolts

Screw-operated adjuster bolts for simple and secure Quadra+ frame installation

- ✓ Quick, easy and accurate installation using only screws
- ✓ Hex-key bolt adjusters make frame alignment simple once the doorset is in the opening
- ✓ Adjusters feature a 10mm limit to provide a physical indication if the gaps are fire compliant
- ✓ Each bolt is individually adjusted to allow for lining undulation

ADJUSTABLE FRAME BOLTS

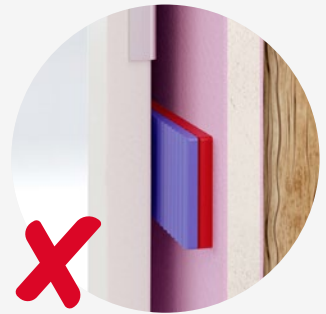

Why **Adjustable Frame Bolts** are the future for riser doorsets...

As risers get tighter for space; a common scenario where ducting or services are sitting directly behind the door/frame, there is no room for access to pack or fire-stop the frame correctly.

SPECIAL FEATURES

- ✓ Access is not required behind the frame when used in conjunction with **Quench** fire-stopping intumescent
- ✓ Eliminates the need for plastic packers
