

FIRE RATING	E120 E120Sa
FIRE STOPPING	INTUMESCENT ACRYLIC SEALANT or QUENCH FIRE-STOPPING
ACOUSTIC RATING	Up To 41dB
Results declared reflect the optimum achievable within the limitations of the test standard and sites specific average results may vary where building elements of different materials interface altering natural acoustic deflection.	

Drawing For Information Only  
NOT FOR CONSTRUCTION

ABOVE TO BE SPECIFIED AS REQUIRED

Please note:  
Wall build up to be certified by others.

FFL CORNER BRACE REAR VIEW

FRONT VIEW

Selo are not the designers responsible for any wall detail if shown, you should know that we are not aware of any fire test evidence for wall constructions which are not, standard as defined in EN1363-1:2020, nor is it our responsibility to establish if such evidence exists.  
Tested detail in accordance with EN1634-1, requires standard supporting wall constructions with a minimum of 200mm either side and above door frame. Flexible wall construction requirement is a minimum of 300mm between apertures. Minimum upstand in flexible standard wall construction 100mm. Outside of these minimum dimensions specific fire test evidence should be sought.  
All requirements of the Fire resistance field of application report from Warringtonfire, for the Selo product/s included in this drawing must be ensured, or an alternative fire assessment for any deviation including non-standard wall details must be sought from a competent and designated body for producing fire resistance assessments.

FROM FACE OF DOOR  
TO FIXING POINTS

Technical drawing of a door hinge assembly. The drawing shows a cross-section of a door and its frame. The door is labeled "Steel with timber ground." and has a width of 50. The hinge is labeled "PIVOT HINGE". The frame is labeled "FROM P TO F" and "TO F". The drawing includes a detailed view of the hinge mechanism, showing the door leaf, the hinge plate, and the hinge pin. The door is shown in a closed position, and the hinge is shown in a cross-section view.

A technical cross-section drawing of a building's exterior wall and roof assembly. The drawing shows a concrete wall with a brick veneer on the exterior and a cavity on the interior. The roof assembly includes a concrete slab, a brick parapet, and a multi-layered waterproofing system. A vertical pipe or vent penetrates the wall and roof. The drawing is labeled with 'A' and 'B' at the bottom left and right corners respectively.

Steel with timber ground.

50

Detail C

Technical drawing showing a cross-section of a wall and floor assembly. The wall is constructed with a steel beam (labeled "Steel with timber ground.") and a timber ground. A dimension of 50 is indicated for the height of the wall section. The floor is shown below the wall, with a marker for "FFL" (Finished Floor Level).
